EDUCATION

Northeastern University – Align Program, Boston, MA

MS in Computer Science Candidate, GPA: 4.0 / 4.0 Sep 2024 – Present

Relevant Coursework: Object-Oriented Design, Discrete Structures, Data Structures and Algorithms, Algorithms

Western Washington University, Bellingham, WA Aug 2015 – May 2019

BA in Cultural Anthropology

TECHNICAL SKILLS

Languages: JavaScript, Python, PowerShell

Frontend: React, Material-UI, Tailwind CSS, Bootstrap, Responsive Design

Backend & Databases: Node.js, Express, Flask, PostgreSQL, MySQL, MSSQL, MongoDB

Tools & Infrastructure: Git, WebSockets, REST APIs, SQLAlchemy, Sequelize, Linux, Azure, Active Directory, Exchange Server, Windows Server

PROJECTS

Real-Time Messaging Application (Flask/React with WebSockets)

Northeastern University | Deployed: pem2k-messenger.netlify.app

- Built full-stack messaging platform with Flask backend and React frontend featuring WebSocket integration for real-time communication across multiple channels and direct messaging.
- Implemented secure user authentication with password hashing, Pydantic data validation, and PostgreSQL database persistence using SQLAlchemy ORM.
- Developed comprehensive test suite with 52 unit tests covering REST API endpoints and WebSocket functionality, ensuring robust error handling and edge case coverage.
- Deployed application using Heroku (backend) and Netlify (frontend) with environment-based configuration management.

WORK EXPERIENCE

1st Security Bank, [Mountlake Terrace, Washington] Dec 2019 – Sep 2025

Help Desk Specialist III

- Provided production support for critical banking platforms including DNA Core, Cview, Instant Open, and Instant Issue, coordinating with vendors and stakeholders during large-scale incidents affecting 700+ users.
- Managed after-hours production support for Mitel Connect phone system including troubleshooting enterprise-wide outages, performing service management, server restarts and updates, and packet trace analysis to resolve VoIP audio quality and connectivity issues.
- Administered Exchange Server, Active Directory, and Cisco VPN infrastructure supporting 700+ users across corporate and branch locations, including user provisioning, security group management, and mailbox administration.
- Delivered on-site technical support for branch and corporate facilities including network infrastructure, workstation deployment, and telecommunications systems.
- Conducted IAM security audits maintaining 100% compliance with GLB and SOX regulatory standards through quarterly reviews and documentation.
- Developed internal web pages and PowerShell automations for reporting and user provisioning, reducing manual workload by approximately 30%.
- Created comprehensive technical documentation for systems, procedures, and troubleshooting workflows to support knowledge transfer and operational continuity.
